

### 3. Establishment of ENARS Model

#### *Emergency Nursing Academic and Research Section*

ENARS is an innovative initiative to integrate, academics and research to provide quality emergency care by Department of Emergency, JPNATC AIIMS in May 2016. ENARS was conceptualised to empower nurses with various new skills, give autonomy and to motivate nurses for evidence-based practice and research.

**Mission:** To deliver quality emergency care services through comprehensive nursing education and research.

#### **Activities under ENARS Division:**

- Regular in-service programs for the nurses (regular academic classes, Skill practices, Hands on sessions)

- **Improving Patient Safety and Quality team:** There is a team of nurses to periodic meetings, Case Audits, data presentations to promote quality improvement initiatives in ED. Many Quality Improvement programs have been presented and awarded at various platform at states and national level.

- **Emergency System and Process Improvement-** Emergency Manual, protocols (regular updating) and clear job descriptions
- **Quality Documentation system**
- **Appreciation, Motivation and get together of ED Nurses & other staff**

➤ **New Learning Models & Disaster trainings:**

- Patient Simulation and Drills
- Table top drills
- Disaster and Mass Casualty Preparedness & Management

**Advance Nursing care**

- **Making a difference** by bringing practice of Ultrasound Guided Nerve Block and Nurse-driven pain-free ED.

**Result:**

- WHO CCET Promulgating this ENARS model in many states such as Kerala, Uttar Pradesh, Chhattisgarh etc
- ENARS actively contributed in many researches, Quality Improvement projects and now academic nurse doing her thesis under ENARS
